VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 2 is not sufficiently backed up by the specification. Relating to Claim 2, there is no concrete description in the specification as to which pads are connected to each other by a bump, and it is not clear as to whether merely adjacent pads are connected to each other by a bump.
